

Manager-accounts

When do I need a Shoplytics Manager Account?

A: You have multiple Shoplytics accounts but want to use a single login at app.shoplytics.de

B: You have one or more Shoplytics accounts and want to give an agency or an employee access without sharing your login credentials.

How does a Manager Account work?

A Shoplytics Manager Account has its own login credentials and, after logging in at app.shoplytics.de, shows all sub-accounts you have access to. With one click, you can switch into the desired sub-account.

How do I get a Manager Account?

To request a Manager Account, please email support@shoplytics.de with the following information:

1. Which email address(es) should the manager access be tied to?
Important: This must not be an email address that is already used for an existing Shoplytics subscription.
2. Which sub-accounts (domains) should the manager have access to? (If you only have one Shoplytics subscription, please still name the domain so we can assign it quickly.)
